

## Ice Surface Gestures

### Record a Goal:

1. Simply Single Tap and hold anywhere on the ice surface area
2. Select the goalie that was scored on by swiping left or right between the available goalie
3. Tap on any of the five dots once to record the location of the goal once goalie has been selected
4. A second view will appear. Fill out the goal scorer and the two assistants from the scoring team. Select the lines that were on the ice at the time from both the home and away team.
5. You can optionally add a penalty by toggling the switch in the top right and selecting the penalty that was occurring at the time of the goal. A penalty must be present before the goal was scored in order to add this data set.
6. Tap the save button on the top left and you will be returned to the ice surface

### Record a Shot:

1. Simply Single Tap anywhere on the ice surface area
2. Select the goalie that was scored on by swiping left or right between the available goalie
3. Tap on any of the five dots once to record the location of the goal once goalie has been selected

1. Two Finger Tap anywhere on the ice surface area
2. Record the offender of the penalty along with the time of the penalty.
3. Tap save and you will be returned to the ice surface

## Record a Faceoff Win:

1. Two finger tap and hold on any of the 5 major circles or blue line dots on the ice surface
2. A view will appear where you will be asked to fill out the winner and loser of the faceoff draw
3. Tap save and you will be returned to the ice surface

## App Input

### Add a Player to Your Team

1. Start by navigating to the home screen and tapping on the “Add” button in the navigation bar
2. Once in the “Add” section of the home screen Tap on the “Add Player” button in the sub navigation bar
3. Fill in the players last name, jersey number along with line number and position type. Tap “Next Step ...”
4. Tap on the placeholder profile picture. Select add picture from Camera or select from Photo Gallery
5. Once a picture has been selected or taken from the camera you new profile picture will be displayed where the temporary one once stood. Simply tap “Add Player” and your player will now be listed on the “Stats” section on the home screen

### Add Team

1. Start by navigating to the home screen and tapping on the “Add” button in the navigation bar
2. Once in the “Add” section of the home screen Tap on the “Add Team” button in the sub navigation bar
3. Fill in the teams’ name and select the season year from the picker
4. Tap in the placeholder team logo image and select add picture from Camera or select from Photo Gallery
5. Once a picture has been selected or taken from the camera you new logo will be displayed where the temporary one once stood. Simply tap “Add Team” and your team will now be saved. The new team can be viewed by selecting it as your default team by tapping the swap button in the upper right corner of the home screen.

# Global App Defaults

## Default Major / Minor Penalty Lengths

1. Open Settings, navigate to the default tab
2. Tap on the penalty defaults cell in the table and a new settings menu will appear
3. Simple select a major and or minor value in minutes as a penalty length  
\*Note - These settings can be changed during a live game on a game per game basis if desired. This does not affect the universal values set in the above tutorial.\*

## Default Team / Home Team Selection

1. Coach Assistants default team / home team can be changed by tapping on the swap logo on the home page
2. Coach Assistants default team / home team can be changed as well in settings under the default tab.
3. Tap on the default team cell, a new settings view will appear. Simply select a team from the picker to be your default team and exit the settings menu. The selection will be saved  
\*Note - A default team / home team simply sets the team of selection to be the home team for a given team opened. Stats will be recorded for both teams involved. The home page will reflect the stats of the selected home team / default team.\*

# In-App Purchases

## Upgrade / Restore Coach Assistant Pro

1. Open the settings and navigate to Subscriptions
2. If you have previously bought Coach Assistant tap Restore
3. If you are upgrading for the first time simply tap Upgrade Now and follow Apples' prompts
4. Restart the app to force all settings to update

# Previous Games Saved

## Open and View Recorded Games

1. On the home screen Tap the Old Stats button in the navigation bar
2. Select a game from the list of previous saved game
3. This selection will bring up a recorded view of this game.
4. An Ice Surface view can be found by tapping on the Ice Surface button while viewing the recorded game home screen (aka the first view presented when selecting the recorded game)

# Live Game Settings

## Live Game Options Menu

1. The in game options can be accessed by Tapping on the Coach Assistant Logo on the bottom status bar while recording a live game.
2. A new view with a couple of games only settings will be displayed.  
\*Note - These settings are not global and are forgotten when the game is closed\*

## Goalie / Period Selection

1. Goalie and or period change can be made by Tapping on the COach Assistant logo on the bottom status bar at the bottom of the Ice Surface of a live game
2. A goalie can be selected by swiping between the goalies available in the game
3. A period selection can be made by tapping on the circles placed on top of the goalies.
4. Tap save to save your selection
